SUMMARY

Frontend Engineer specialized in architecting immersive, responsive user interfaces using **Next.js**, **TypeScript**, and **Framer Motion**. Expert in modern development workflows (Cursor, LLMs) and automated deployment pipelines via **Vercel**. Experienced in migrating legacy systems to **Redux Toolkit**, resulting in a **35% reduction in re-renders** and significantly enhanced UI responsiveness for data-heavy enterprise platforms.

EXPERIENCE

Freelance Frontend Engineer | Remote

05/2025 – Present

- **Project:** [The Rare Store](#)
- **Tech Stack:** Next.js, TypeScript, Framer Motion, Tailwind CSS, Vercel.
- Developed a high-performance e-commerce storefront focused on **fluid UX**, utilizing **Framer Motion** for seamless page transitions and interactive element animations.
- Engineered a responsive, mobile-first UI that maintains design integrity across all device types, leveraging **Tailwind CSS** for efficient styling.
- Optimized deployment via **Vercel**, ensuring fast LCP (Largest Contentful Paint) scores and a smooth end-to-end shopping simulation.

Web Developer

Jabalpur, MP

[Nivss Heritage](#)

03/2024 – 04/2025

- **Architected and optimized** a high-traffic e-commerce platform using React.js and Tailwind CSS, resulting in a 40% reduction in layout defects and seamless cross-device compatibility for mobile shoppers.
- **Managed automated deployments** via **Vercel**, ensuring seamless integration of new features and maintaining a 99.9% uptime for the production environment.
- **Developed a proprietary library** of reusable React components for product galleries and filters, increasing development velocity by 25% and ensuring long-term codebase maintainability.
- **Spearheaded UI performance audits**, implementing code-splitting and lazy-loading for high-resolution product imagery, which improved initial page load speeds by 30%.
- **Structured an optimized frontend data flow**, eliminating deeply nested prop-drilling and lifecycle inefficiencies to achieve a 35% reduction in component re-renders.
- **Streamlined API integration** by utilizing **Postman** for endpoint testing and documentation, reducing backend-to-frontend communication errors by 20%.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering | Graduated 2025

St. Aloysius Institute of Technology (Affiliated with RGPV) | Jabalpur, MP

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, Java, SQL

Frameworks & Libraries: Next.js, React.js, Node.js, Redux Toolkit, Tailwind CSS, Framer Motion, Shadcn/UI, Flask, FastAPI

Tools & Platforms: Cursor, VS Code, Git, Vercel, Postman, Google Cloud Platform (GCP), Firebase, Netlify, IntelliJ

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Microservices, Operating Systems, Computer Networks

PROJECTS

QuickStay | [Live Demo](#) | [GitHub](#)

09/2025 – 11/2025

Full-Stack Hotel Management Engine

- **Engineered a comprehensive SaaS platform** using the MERN stack, featuring a centralized dashboard for real-time room inventory and booking management.
- **Integrated Clerk-based Enterprise Authentication** and Role-Based Access Control (RBAC), securing sensitive administrative routes and user data.
- **Built a robust financial layer** by integrating the Stripe API and custom date-validation logic, effectively eliminating booking conflicts and automating transaction workflows.
- **Optimized Vercel deployment** with advanced rendering strategies, achieving a Lighthouse Performance Score of 90+.

WorkTrack | [Live Demo](#) | [GitHub](#)

03/2025 - 05/2025

Enterprise Employee Management System

- **Developed a scalable management portal** capable of handling dynamic CRUD operations for large-scale employee datasets.
- **Enhanced data-grid usability** by implementing server-side filtering, sorting, and pagination, reducing data retrieval latency by 40%.
- **Leveraged React Context API** for global state management, replacing legacy prop-drilling patterns and increasing UI responsiveness by 25%.
- **Established a modular folder architecture** and design system that reduced future feature development time by an estimated 30%.
